_____

Summary

Full-stack developer with 15+ years building and modernizing web applications across healthcare, education, and media. Deep experience with PHP/Laravel, WordPress, React/Vue, and .NET/C#; strong in SQL Server/MySQL, cloud (AWS), and performance optimization.

_____

Core Skills

Languages/Frameworks: PHP, Laravel, C# (.NET/.NET Core), React, Vue, TypeScript, WordPress, Angular, Node.js

Databases/Tools: SQL Server, MySQL, Entity Framework, Redis, Git

Cloud/DevOps: AWS, Linux, Docker, CI/CD, API Integrations

Other: ACF, WebSockets, Agile (Scrum/Kanban), MVP delivery

_____

Experience

Senior Developer (Contract) — ReminderMedia • Remote
Jan 2025 – Jul 2025

- Enhanced multi-codebase Laravel + Vue client portals; shipped MVP-paced features in Agile teams.
- Implemented async workloads with events/queues; introduced AI-assisted content features.
- Managed Linux VMs and Docker deployments; collaborated via Jira/GitLab and code reviews.

Software Developer II — Liberty Fox Technologies • Remote
Sep 2021 – Sep 2024

- WorkMerk: Migrated production .NET Framework app → .NET Core; modernized dependencies, improved security posture, and enabled CI/CD.
- Pentec Health: Built AlayaCare ↔ internal DB sync using SQL Server triggers + Amazon SQS; achieved near real-time parity and reduced manual reconciliation.
- MyPTS Time: Optimized reporting via SQL Server stored procedures; cut complex report times from minutes to seconds.
- Galxy Scheduler: Angular + Laravel drag-and-drop scheduler with AWS MediaTailor; automated daily playlist generation/uploads.
- FlixFling: Upgraded Laravel 4→10 and Ubuntu 14.04→22.04; integrated Azure Media Services; shipped Roku/Tizen JS apps and Android app.

Full Stack PHP/WordPress Developer — Freelance • Remote
Jan 2018 – Sep 2021

- Built custom WordPress themes/plugins and scalable PHP/MySQL backends for SMEs and clinics.
- Created a custom JWT authentication plugin; implemented secure SSO flows.
- Optimized Linux server configs for performance, caching, and hardened security.

Full Stack PHP Developer — KSA&D • Allentown, PA & Remote
Sep 2013 – Jan 2018

- Delivered responsive front-ends (HTML5/CSS3/JS) and maintained PHP/WordPress backends.
- Managed Linux hosting and trained clients on CMS workflows.

Lead Developer — OptimizePress • Remote
Dec 2012 – Sep 2013

- Led development of OptimizePress v2 (pre-Gutenberg WordPress page builder) with extensible plugin architecture.
- Refactored undocumented PHP codebase; coordinated delivery across time zones.

_____

Selected Projects
- Debatabl — Real-time debate platform (Laravel, Vue, WebSockets).
- St. Luke's Health Network — ~30 physician WordPress sites using ACF + multisite.
